

CRAFTSMANSHIP.

WOODHAVEN
LOG & LUMBER

True to the Grain

*For beauty inside
and out, it starts with
a belief from within.*

CRAFTSMANSHIP AT EVERY STEP.

It's the nature of our business.

Welcome to Northern Michigan. Birthplace of some of the most remarkable timber in all of North America. Here, our logs are steely by the winter winds that blow off the Great Lakes, subzero temperatures, seasonal rains and long, hot summers.

The timber is harvested in its prime. From a local Amish mill,

we hand-select the best premium grades for our customers.

By its very nature, this wood is destined for great things.

The secret to our exceptional logs is the secret to exceptional wine: the drier, the better.

We're not satisfied with the industry standard, so we dry and store the pines, cedars and aspens ourselves, ensuring the least amount of movement and shrinkage.

These logs have waited dozens of years to reach their destiny. By waiting just a little longer, they achieve the kind of perfection that makes all the difference.

A respect for our resources. A responsibility to our people.

It's that simple. We respect the wood, and we don't believe in waste. So we cut our log siding and paneling in easy-to-use eight-foot lengths, tongue and groove on all four sides for smooth installation. End matching – along with our unique mixed-length bundles – creates a distinctive look and enhances the beauty of our product.

Some prefer a smooth surface. Others a rustic hand-hewn look. Whatever you choose, be assured that every piece of WoodHaven siding carries our signature trademark: ALL FOUR faces of the wood are exceptional.

"As part of Woodhaven's philosophy of preserving and protecting our natural resources for future generations, our suppliers adhere to the standards and guidelines set forth by the Sustainable Forestry Initiative.® From wood scraps to sawdust, we recycle all of the by-products from our milling process. We respect the wood, as well as our environment."

YOUR DREAM BECOMES OUR DREAM TOO.

Most customers come to us already knowing what they want. They've done their homework. They know about wood, and that makes our job both easier and harder.

It's easier, because we can have a dialogue. We can talk about why – from a contractor's perspective – an

eight-foot log is easier to work with than a 16-foot log and looks just as good. We can talk about the various woods and end-matching and why we happen to think Northern Michigan timber is just a little bit better than anywhere else.

But it's harder, because...well, we get involved with their project. And maybe we spend a little too much time talking and looking through samples, and most days don't end at five.

But we don't mind so much. There's something about a couple who have bought a piece of land on a river and they want a log home. Their dream becomes our dream, too.

That's a good feeling at the end of a long day.

Products to complete the exterior and/or interior :

- 1 Decking.** Our 2x6 or 2x8 roof and loft decking is smooth and beveled on one side. If not being used as a structural element, our tongue and groove paneling provides the same great look.
- 2 Log Trusses.** Decorative or structural, our log trusses and beams are a great way to top off any project. Pine poles are available from 4 to 16-inch diameter, green or kiln dried.
- 3 Support Posts.** Our flared-bottom posts offer a unique touch to any porch or deck.
- 4 Cedar Railing.** In addition to providing security, our cedar railing enhances the perimeter of any home.
- 5 Log Siding.** Our most popular log siding style, the hewn half-log siding is perfect for those who want a full-log home without the full-log price. Available in 3x6, 3x8 & 3x10.
- 6 "D" Trim.** With plenty of sizes, from 2x4 to 4x6 (and others, depending on your log siding and the look you want to achieve), our trims give a finished look to any window or door opening.
- 7 Staggered Corner.** Completing the full-log look, our staggered corners are available in several styles, making them the perfect companion for all of our log siding.
- 8 Inside Corner.** In addition to providing vertical definition, our inside corners make finishing the corner joint fast and simple.
- 9 Corner Posts.** Our popular posts are a beautiful addition to your architecture. Available in 6-inch diameter for quarter-log siding & 8-inch diameter for half-log siding.

"Our log cabin looks incredible. The hewn half-log siding used with the full log accessories has given us the charm of a traditional log cabin – at a fraction of the cost! Thanks again for the exceptional service you provided. It's been a true pleasure doing business with you and your company."

Patrick & Gina Fox
Antrim County, MI

"Thanks for all the help you have given us with our Ausable River home. From the fireplace mantel and deck railing to the quarter-log siding, everything looks great. It is nice working with a company that cares about their product and the job you're working on. Thanks again."

Mike & Jeanne Pollock
Swanton, OH

Products to complete the interior:

- 1 Mantels.** Our log mantels are available in customized depths and distinctive profiles. Sure to warm up any environment even *before* you start the fire.
- 2 Flooring.** Available in pine in 4, 6 & 8-inch widths, our flooring is tongue-and-grooved on all four sides. We also have a complete selection of hardwood flooring, from the common to the exotic.
- 3 Log Siding.** Our most affordable log siding solution, the quarter-log siding is available in 2x6 & 2x8, with either a smooth or hand-hewn look.
- 4 "D" Trim.** With plenty of sizes, from 2x4 to 4x6, our trims give a finished look to any window or door opening.
- 5 Corner Posts.** Our popular posts are a beautiful addition to your architecture. Available in 6-inch diameter for quarter-log siding & 8-inch diameter for half-log siding.
- 6 Paneling.** Available in a wide variety of sizes and woods, our knotty-pine paneling is made with WoodHaven's unique end-matching — the same feature found in our log siding products. Also available pre-finished from our mill.
- 7 Rafters.** Available smooth or hewn in a variety of sizes, our rustic timbers not only look great, they are kiln dried to the same standards as our siding products.
- 8 Trim.** Used for everything from window and door casing to baseboard molding our S4S (smooth four sides) adds a finished touch to any project. Available in 1x4, 1x6 & in pine.

A THOUSAND WORDS.

We've discovered that if you turn a real craftsman loose with our products, it's amazing what he can come up with.

These pictures are evidence. They tell our story. It's a story told as far west as California and east up to Maine, as high as Denver and as low as the flatlands of Kansas.

Before

Our wood is showing up on everything from homes to summer cottages to resorts, even to bowling alleys and gas stations.

That's a feeling that words can't describe.

E-Z LOC SIDING SYSTEM[®]

Where nature meets technology

The warmth and beauty of a rustic log home can easily be achieved with the thoughtful and efficient design of WoodHaven Log & Lumber's E-Z Loc Siding System.

By selecting WoodHaven's unique system you will save time, virtually eliminate waste and reduce material costs. Our E-Z Loc Siding System does away with miter joints, face nailing and the need to place your joints on 16-inch or 24-inch centers of conventional framing. Forget "measure twice to cut once" for proper fitting. No cuts are needed to start a row and one cut finishes a row.

Through a simple installation process, each piece of siding and paneling effortlessly locks together with the end-matched tongue & groove. Joints lock together becoming one solid piece. The product is then nailed through the tongue and into the studs allowing the joints to fall at random intervals. Fasteners are hidden by the overlapping groove, permitting the natural beauty of hand-hewn, non-repetitive, wood grain patterns to be the star.

Whether you're a do-it-yourself homeowner or contractor, you'll appreciate the ease of handling and time savings associated with our paneling and siding being produced in 8-foot and shorter lengths.

With the E-Z Loc Siding System, ease of installation does not sacrifice excellence. Our strict quality control process ensures the best wood products in the industry. Each piece is meticulously inspected throughout the milling and drying process to ensure the highest quality finish and precise dimensions.

With WoodHaven Log & Lumber products, creating a distinctive, natural wood environment is easier than you think.

Easy to Get Your Hands On. Hard to Put Down.

While our pictures are pretty, and our descriptions sound good, when you hold our product in your hand, it speaks for itself. Seeing is believing – and we want to share it with you! When you request a sample kit, you'll receive:

- ☐ Pricing information
- ☐ An informational brochure
- ☐ 2x6 and 2x8 quarter-log siding samples
- ☐ 3x6, 3x8 and 3x10 half-log siding samples
- ☐ 2x4, 3x4 and 4x4 half-log "D" trim samples
- ☐ 2x6 loft decking sample
- ☐ 1x4, 1x5, 1x6 and 1x8 knotty-pine paneling samples
- ☐ End-matching samples

DISTINCTIVE SIDING OPTIONS

Adirondack Siding

With our prefinished Adirondack siding, every plank can aspire higher than the classic outdoor easy chair. Now, those elegantly simple lines can easily lend that distinctive look to your home's exterior. You can count on WoodHaven Log & Lumber for expertly crafted and dimensionally reliable siding, so it's easy to feel good about your choice. And with the tongue and groove profile on all four edges, installing them is as easy as it gets.

FatBoy Log Siding™

This is lumber that's pure muscle. FatBoy Log Siding™ is the beefiest log siding on the market, giving your home the look of massive logs at a fraction of the cost (and without harming old-growth trees). And you won't have to wrestle these big guys; our EZ Loc Siding System is designed for simple, fast installation... and a long life of sturdy natural beauty.

Barn Wood Siding

The charm of reclaimed, old barn wood just can't be overstated. And now that look can be yours – without the long drives, nail holes and paying a king's ransom. With our special process, wood accepts the stain like an old friend. And while the look is authentic barn siding, the performance is everything premium quality wood can offer. Our tongue-and-groove barn siding is end matched, so it goes up easily indoors or out.

*Let's talk about
your project.*

One look and you'll see that WoodHaven products are "true to the grain," and the perfect building blocks for your dream home. We're proud of our product – and want you to be too.

So we invite you to come for a visit, see the logs for yourself. It's a good feeling to meet the people who buy our products. It reminds us just why we put so much care into what we do.

Call us toll-free for samples or to schedule a visit to our mill.
